Before and After

■ Advantage

- Stable Operation
- Convenient to Treat with Smart Protocols
- Low risk of Side Effect
- Fast Treatment

■ Pico Legend has the shortest pulse width of 350 ps

■ Low risk of side effect

Less thermal effect on the treated area makes the best result of treatment with low risk of side effect

■ Indications

Tattoo, Wrinkle, Acne, Nevus of ota, Blue nevus, Speckled nevus, Lentigo, Cafe au lait, Hyperpigmentation, Freckle, Melasma and so on

■ Super ultra short pulsed width

Picosecond Nd:YAG Laser (1064nm&532nm + 595nm 660nm HP+ Fractional HP) with super ultra short pulse width

■ HandPiece

The fractional hand-piece uses fractional beams (360 spots, 16x16mm) to allow higher fluence (J/cm<sup>2</sup>) compared to the bulk mode hand-piece, allowing it to effectively destroy various pigmentations which were hard to treat before.

Fractional Hand Piece (1064nm)

Zoom Hand Piece (2-10mm Standard)

Dye Hand Piece (660 / 650 / 595 / 585nm)
